(54) Title: A METHOD AND A DEVICE FOR MEASURING STRESS FORCES IN REFINERS

(57) **Abstract:** The invention relates to a method for measuring stress forces in refiners having refining discs that between them define a refining gap for refining material between bars (3) arranged on the refining discs. The measuring is performed over a measuring surface (2) that constitutes a part of a refining disc, said measuring surface comprising at least parts of more than one bar (3) and being resiliently arranged in the surface of the refining disc. Furthermore, forces in a plane at right angles to the measuring surface are measured. The invention also relates to a device for performing said method.
